

Hongyi Li

Shenzhen, Guangdong, China • +86 133-6811-3249 • 2018210349@st.scfai.edu.cn

EDUCATION

Sichuan Fine Arts Institute

• Bachelor's Degree in Photography and Production of Film and Video

Sep 2018 – Jun 2022

Chongqing, China

WORK EXPERIENCE

Applied R&D (Technical Artist) | Tencent Games – LIGHTSPEED STUDIOS, Omni Research

(Tencent subsidiary)

Aug 2023–Mar 2026

Shenzhen, China

Key Responsibilities

- Contributed to the design and continuous iteration of batch-processing pipelines for 3D data in AI auto-rigging projects.
- Managed data production and quality control, including task planning, team training, quality review, issue tracking, and final delivery.
- Evaluated AI auto-rigging results, analyzed and categorized recurring issues across 3D models of varying complexity, and contributed to the design of post-processing features and plugin interactions.
- Evaluated existing AI tools in terms of their capabilities, performance, and interaction workflows, and created and maintained documentation including data-production guidelines, workflow documentation, and tool documentation.
- Provided 3D modeling, animation processing, rendering, and other visual-content support for multiple AI research projects.

Selected Contributions

- **Peacekeeper Elite** — Developed and continuously iterated batch-processing pipelines for an AI auto-rigging project; evaluated internal AI tools and contributed to post-processing features, plugin interactions, and integration into practical art-production workflows.
- **Aoxing Heatwave** — Managed motion-capture data production for an AI-generated dance project, including requirement coordination, annotation-team management, quality control, data delivery, and cross-team collaboration.

3D Artist | Chongqing Yujitu Technology Co., Ltd.

Oct 2022–Apr 2023

Chongqing, China

- Created production-ready 3D models for commercial projects, following project specifications and asset requirements.

RESEARCH CONTRIBUTIONS

Light-SQ: Structure-Aware Shape Abstraction with Superquadrics for Generated Meshes

SIGGRAPH Asia 2025 | Co-author

- Contributed to the development of a batch-rendering script.
- Designed and produced the project cover and poster.

TailorRig: Controllable and Structured Auxiliary Skeleton Generation for Garment-Aware Rigging

Submitted to SIGGRAPH Asia 2026 | Contributor

- Contributed continuously to dataset development and data production.
- Designed and produced the project cover, poster, and related visual materials.

TECHNICAL SKILLS

- **Skills:** 3D Modeling, Procedural Materials, Material & Shader Development, Data Processing, Pipeline Development, Workflow Automation
- **Software:** Unreal Engine, Blender, Substance 3D Designer, Substance 3D Painter, Marvelous Designer, ZBrush, Motion Builder
- **Programming Languages:** Python, HLSL
